TJ's BORDEAUX BY THE GLASS AND STEAK PAIRINGS

TJ, the wine team, and our Executive Chef have chosen wines from select chateaus in France's Médoc (Left Bank) and Libournais (Right Bank) regions to pair well with steak. Although Bordeaux produces some of the most expensive wines in the world, it also produces delicious bottles at exceptional value for everyday drinking.

Left Bank Bordeaux is an excellent match with fattier-salty steaks, due to a higher percentage of Cabernet Sauvignon. Right Bank Bordeaux red wines pair best with leaner cuts, like Filet Mignon. We have suggested Bordeaux wines that perfectly complement our special Prime and Wagyu cuts.

<p>In the south of Médoc, Graves produces fabulous white Bordeaux wines made with a blend of Sauvignon Blanc and Sémillon. Only 8% of the wine produced in Bordeaux is white, but it is a staple for people of Bordeaux when ordering oysters, shellfish, or mussels. Enjoy flavors of flint and mineral, fresh-cut grass, and bright citrus notes.</p>

CORAVIN ELITE WINE BY THE GLASS

A best-in-class wine preservation system keeps wine safe from oxidation, allowing it to continue aging naturally. Using a specially designed, coated wine needle, we pierce gently through the wine cork and pour wine quickly and smoothly. Argon, an inert gas used in winemaking, then enters the bottle to protect the remainder from oxidation.

Left Bank: Médoc & Graves

The Gironde Estuary divides the Bordeaux region into a Left Bank area that includes Médoc & Graves. Sub-regions within the Haut-Medoc include St. Estèphe, Pauillac, St.-Julien, Margaux, and the less well-known areas of AOC Moulis and Listrac. Graves includes the sub-regions of Pessac-Léognan and Sauternes, among others, and Sauternes includes the sub-region of Barsac.

Right Bank: Libournais, Bourg and Blaye

North of the river Dordogne, the Libournais includes sub-regions Saint-Émilion and Pomerol, among others. An additional wine region of Entre-Deux-Mers lies between the Garonne and Dordogne rivers, which combine to form the Gironde. These regions, except the Libournais, have their own Appellation d'origine contrôlée (AOC) laws that dictate permissible grape varieties, alcohol level, pruning and picking methods, planting density, and appropriate yields—as well as winemaking techniques. Bordeaux wine labels will usually include the region on the front if all grapes have been harvested in a specific region and the wine otherwise complies with AOC requirements.

BURGUNDY

Bourgogne

The French wine region of Burgundy may be small in size, but its influence is huge in the wine world. Its six sub-regions produce some of the most expensive wines in the world. Chardonnay and Pinot Noir grape varieties represent the majority of wines from Bourgogne, with small production of Aligoté, Pinot Gris, and Gamay. Burgundy has more AOCs than any other region and is seen as the most terroir-conscious. Vineyards are delineated by terroir in Burgundy, a practice dating to the Middle Ages when various monasteries played a key role in developing the Burgundy wine industry.

## Magnificent Toscana

The heart of Italy is also the center of the country's most important quality-wine exports. These are dominated by famous red Sangiovese wines from the Tuscan hills and the valleys between Florence and the Umbria-Latium border. Sangiovese is one of the most difficult wines to produce outside of Tuscany, signifying its special place in the wine-producing community.

# THE NAPA VALLEY

Napa County is the heart and soul of the California wine industry. Its vineyards are concentrated, with more wineries than any other county, and they produce the greatest number and variety of fine wines in North America.

## Napa Valley Floor

This AVA includes all of the county, except for the area around Putah Creek and Lake Berryessa. The valley floor is 25 miles (40 kilometers) long and between eight and 12 miles wide (16 kilometers) and is sheltered by two parallel mountain ranges. Most vineyards occupy the flat valley floor in a continuous strip from Napa to Calistoga.

# SANTA CRUZ MOUNTAINS

The name “Santa Cruz Mountains” was first recorded in 1838. Its climate is influenced in the west by ocean breezes and maritime fog, while the east is moderated by San Francisco Bay. Cool air coming down from the mountains forces warmer air up, lengthening the growing season.
